

CleNET Technologies Canada

Software Developer - Automotive Infotainment

Location: Markham, Ontario, Canada

Position Title: Android User Interface Developer

CleNET is a mobile, automotive and enterprise software services and solutions research, engineering and development company founded in the U.S. in the year 2000. We currently have over 1,900 employees worldwide, supporting customers in North America, Asia and Europe. We have over ten locations across US, Canada, Mainland China and Taiwan. CleNET has been named Global Outsourcing 100 in nine consecutive years.

CleNET is expanding its presence in Canada to better serve our industry leading customers in next generation automotive infotainment product engineering. We are working on state-of-the-art technologies and products that will bring automotive information and entertainment, mobile internet and telematics services to life in the years to come.

CleNET Canada is looking for intelligent, creative, enthusiastic and diligent software professionals to join our team and shape the great future of your career with us.

Role Summary

As an Android User Interface Developer, you will work as a front-end developer to bring product ideas to reality. You will have the opportunity to work closely with interaction and visual graphic designers to understand and convert design vision into elegant software. You will have the opportunity to work on the latest Android SDK and APIs.

Responsibilities:

- Work closely with interaction and visual graphic designers to understand and convert design into elegant and responsive production code.
- Participate in discussions to improve maintainability, reuse and adoptability of Android XML resources
- Evaluate new technologies and provide innovative solutions for implementation direction.
- Create consistent and reliable software for a range of form factors and different input devices, such as Touchscreens and multi-function controllers.

Qualifications - Required Skills and Experience

- Bachelor degree in Software/Computer Engineering, Computer Science or other related field
- At least two years of related experience in User Interface and Android Mobile application development
- Hands-on experience using multiple versions of Android SDK, Android Studio, screen resolutions and various input device types

CleNET Technologies Canada

- Ability to create clean Android Layouts and UI elements, such as Views, Styles, dialog, menu, and Animations
- Experience in Java and XML
- Experience in working in an Agile development environment
- Exposure to collaborative tools such as Git and JIRA

CleNET offers equal opportunities to people. We would like to thank all applicants for expressing interest. However only those selected for interviews will be contacted. Reference check of certain positions will be conducted with prior permission.
